KALTCHUGA FUND - RUSSIA EQUITIES, class B EUR LU0290814093

a sub-fund of KALTCHUGA FUND (the "fund")

This sub-fund is managed by Lemanik Asset Management S.A.. (the "Management Company")

Objectives and investment policy

Objectives

The objective of the sub-fund is to achieve long-term capital growth.

Investment policy

The sub-fund compares its performance against the MSCI Russia Net Total Return USD Index (MTRU Index) (the Benchmark Index). The sub-fund does not try to replicate the Benchmark index and freely selects the securities that it invests in. This deviation with the reference Benchmark Index may be significant.

The sub-fund is actively managed and invests primarily in Russian equity securities listed on the Moscow Interbank Currency Exchange (or MICEX).

The sub-fund may invest in American Depositary Receipts (ADRs), European depository receipts (EDRs) and Global depository receipts (GDRs) traded on regulated markets outside Russia, mainly in the US and in Europe.

The sub-fund invests at least 75% of its assets in:

- equity securities issued by companies that have their registered office or conduct the majority of their business activities in Russia, and;
- aforementioned ADRs/EDRs/GDRs, whose underlying assets are issued by companies domiciled in Russia.

The sub-fund may invest up to 15% of its assets in Ukraine, Kazakhstan, Georgia, Belarus, Uzbekistan as well as other CIS countries equity-related securities.

In accordance with the principle of risk spreading, the sub-fund may invest in-cash and cash equivalents, term deposits, money market instruments and debt securities dealt in on a Regulated Market. Investments in debt securities may not exceed 15% of the sub-fund's net assets.

Investments in UCITS or in other UCIs may not exceed in aggregate 10% of the sub-fund's net assets.

The sub-fund may also invest in equity-related securities including without limitation, preference shares, convertible securities, warrants on securities, and other equity-related instruments qualified as Transferable Securities according to the 2010 Law and may borrow cash and cash equivalent of up to 10% of its assets on a temporary basis to cover or to anticipate the possible coverage of a shortage of liquidity.

The investor may convert and redeem shares on each bank business day in Luxembourg.

Income of this share class is reinvested (accumulated).

Recommendation

This sub-fund is appropriate for investors seeking long-term capital growth.

Risk and reward profile

What does this synthetic indicator mean?

- The calculation of the risk indicator is based on historical data which may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category shown is not guaranteed to remain unchanged. The sub-fund's risk indicator may shift over time.
- The lowest category of the risk indicator does not mean a risk-free investment.
- The shares of class B EUR are classified in category 6 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.

What are the most significant risks not included in this indicator?

- **Emerging market risk:** The fund invests in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and

falls in value and may suffer trading problems. A fund which invests in emerging markets rather than more developed countries may encounter difficulties when buying and selling investments. Emerging markets are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

- **Currency risk:** The fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.
- **Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the fund's returns because the fund may be unable to transact at advantageous times or prices.
- **Counterparty risk:** As the fund uses over-the-counter contracts, there is a risk that the counterparty to the transactions will wholly or partially fail to honor its contractual obligations. This may result in a financial loss to the fund.

How can I get more information about the risks of the sub-fund?

For further information concerning the risk of the sub-fund, please consult the section entitled "Principal Risk Factors" of the Prospectus, which is available at the registered office of the fund.
